

MERITOR® PADS & ROTORS

IMPORTANT INFORMATION

AFTERMARKET PARTS WARRANTY

We warrant all new parts for one year from date of shipment to the buyer against defective material or workmanship (but not against damage caused by accident, abuse or improper installation, maintenance or repair) when such parts are used on vehicles the specifications of which have been approved by our Engineering Department.

As the exclusive remedy under this warranty, we will, at our option, repair or replace such parts free of charge, or take back the nonconforming parts and refund the monies paid by buyer for such parts, if found on examination by us to be nonconforming and if necessary return charges are prepaid.

If it is necessary to return any parts under this warranty, buyer agrees not to make any deduction on account thereof from remittances on current accounts while claims are in the process of disposition. Any expense incurred without our consent for repairs or replacement will not be allowed.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. IN NO EVENT SHALL SELLER BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE.

Only genuine Meritor replacement parts are covered by this aftermarket parts warranty.

DISCLAIMER

Information contained in this publication is in effect at the time the publication was approved for printing and is subject to change without notice or liability. Meritor, reserves the right to revise the information presented or discontinue the production of parts described at any time.

Manufacturers names, part numbers, symbols or other references appearing in this catalogue are used for reference for order of goods only. Images are also for reference only and not to scale.

MDP SERIES PRODUCT INFORMATION

Meritor MDP Series Brake Pads

The MDP series brake pads from Meritor set high standards in commercial vehicle aftermarket disc brake pads. The brake pads featuring M520 friction material are manufactured to the highest standards in a TS-16949 accredited state-of-the-art Meritor approved facility. With pads to fit the most popular European truck, bus and trailer applications the MDP series come complete with fitting kits (where applicable).

New Identity

With its own new brown box and part numbering sequence the MDP series can be perfectly differentiated from the MDP5000 series of Original Equipment brake pads. The “brown” image is the new colour of quality for aftermarket brake pads.

New Performance

Not only does the exclusive Meritor M520 friction material featured on the MDP3000 series of brake pads fall within the +/-15% performance requirement for UNECE R90 it also delivers pad and disc wear rates that are close to OE standards. In addition the performance characteristics of M520 are superior to the majority of aftermarket friction materials. As you would expect every pad is UNECE R90 approved but more than that Meritor have tested the pads in many additional aspects than the minimum requirement to achieve UNECE R90.

R90 Performance Graph

MDP SERIES FEATURES

SPECIALLY DEVELOPED INITIAL PERFORMANCE COATING

- Provides optimum initial braking performance
- Accelerated bedding & conditioning process
- Cleans brake disc surface

MDP SERIES TESTING

Testing

Through a combination of internal and independent external testing, conducted in accordance with the ISO15484 protocol and other industry recognised test schedules, a number of aftermarket brake pad materials were evaluated alongside a market leading Original Equipment friction material.

Using the Original Equipment friction material as a benchmark the Meritor M520 material and seven other aftermarket brake pads were tested to extremes of speed, temperature, pressure and deceleration.

Brake pad quality is a question of balance and compromise between brake pad wear, brake disc wear and consistent predictable performance.

During the extensive testing the Meritor M520 friction material consistently delivered similar levels of brake performance, pad wear and disc wear to the benchmark OE material.

Below are the results of these tests for M520 and six main competitors' materials in terms of brake performance, brake pad wear and brake disc wear.

Often brake pad suppliers claim to deliver "better than OE" brake pad wear but from the test results you will see that although some of the competitor's pads deliver excellent pad wear it is usually at the expense of disc wear and/or brake performance.

The majority of the wear and performance evaluation was carried out independently and impartially by Brake Testing International Ltd UK on behalf of Meritor CVA Europe.

Key to Brake Performance Graphs

Friction levels in this area are too high and could lead to over-performance of the brake resulting in: noise and/or brake judder, wheel lock and unpredictable brake behaviour.

Green Performance
Bedded Performance
Post 100°C
Post 200°C
Post 300°C
Post 400°C
Post 500°C

Friction levels in this area are too low and could lead to under performance resulting in; increased stopping distances and brake test failure.

Competitor G

The seventh set of pads were of such poor quality that they didn't even make it to the end of the wear test.

REJECTED

MDP SERIES VS ORIGINAL EQUIPMENT

Throughout the tests the M520 friction material as used exclusively on the MDP series of brake pads consistently delivered comparable brake pad wear, brake disc wear and brake performance to the OE material even at temperatures in excess of 500°C.

Meritor MDP series delivers pad wear within 12% of the OE

Meritor MDP series delivers better brake disc wear than the OE

Even after being operated at over 600°C the shear strength of MDP series exceeded the industry standard

MDP series performance is equivalent to the Original Equipment Material. In fact the MDP series pads were certified against 7 different OE materials

After more than 6000 brake applications at varying temperatures (up to >500°C) and varying deceleration rates and having considered every aspect of the brake pad including friction performance, pad & disc wear, friction material integrity and friction material to backplate security we finally gave the new Meritor MDP series of brake pads a seal of approval.

MAX SERIES PRODUCT INFORMATION

Meritor is the global leader in brakes for heavy duty trucks, trailers and buses. MAX pads are the newest addition to our range and represent the next step up in performance and durability from our popular MDP3000 series. Tested to far exceed ECE R90 performance requirements MAX Pads are designed specifically for those aftermarket customers who choose to run with the best.

- Outstanding friction coefficient
- Reduced rotor wear
- ECE R90 approved
- Premium braking performance

Premium: M550 Friction material – for Meritor, Knorr & Wabco brakes

Applications: High demand usage – Bus, Coach, Heavy duty truck and trailer

Back Plate: Wiremesh

- New M550 Friction material for heavy duty and bus applications.
- Excellent braking performance in high temperatures up to 500 degrees.
- More braking power.
- Consistent and reliable brake performance.
- Reduced levels of disc wear.
- Meritor Premium pads feature high quality back plate and bonding technology.
- Better pad wear performance vs other aftermarket products.
- In high stress situations Meritor Premium pad performs better than other typical aftermarket friction material.
- Lower operating costs.
- Every brake pad is hard marked “MER” Batch-code to ensure Permanent traceability.
- ECE-R90 certified.
- Complete fitting kits.

MAX SERIES FEATURES

Meritor 'Wire Mesh'
Retention System

Full face bedding-in coating
performance from first fit

Thick backing plate
Maximum resistance to bend and flex. Ensures
reduction in hot spotting and presents full pad face
to the disc

- **Torque** - Correct torque across speed, pressure & temperature.
- **Fade** - High resistance at full pressures and peak temperatures.
- **Modulation** - The strong fade resistance and reliable recovery give great confidence to the driver.
- **Recovery** - Consistent recovery levels, after any fade.
- **Material** - It's critical to ensure the material stays firmly fixed in place. Our 'Wire Mesh' retention system has the best of hot and cold shear resistance.
- **Pad life** - A long life product with features and benefits.
- **Disc wear** - Wear levels in line with the best of the best.
- **Disc thermal fatigue** - Ultimate resistance to cracking and hot-spotting of the disc.

MER 000112

Manufacturing batch / date code for traceability and
Marked as MER: using the first 3 digits of MERITOR.

- Unique Premium Pads numbers:
MAX + last 3 digits of WVA number
"K" suffix indicates fitting kit included.
- Exclusive new Meritor 550
Friction material.
- ECE-R90 approved.

MAX SERIES TESTING

The new Meritor M550 friction material has been tested in combination of Meritor Testing and Prototype laboratory (Cameri, Italy) and an independent external certified testing laboratory, under exact Meritor quality and engineering standards.

To stop a vehicle you need to convert all of the energy of motion to heat.

- A 44 tonne truck driving at 90 km/hr. has kinetic energy of 13.75 Million Joules.
- A sports car having the same kinetic energy would be traveling at 440 km/hr.
- 13.75 Million Joules is enough energy to do this to a brake system.

The new M550 friction material was tested to extremes of:

- Speed ■ Temperature ■ Pressure ■ Deceleration

PREMIUM WEAR AND BRAKING PERFORMANCE

- Excellent braking performance in high temperatures over 500 degrees.
- More stopping and braking power.
- Reduced levels of disc wear.
- Better pad wear performance vs other aftermarket products.

Brakes under high demand utilization reach temperatures over 500°C.

STOPPING POWER

M550 friction material has higher friction than other OE high demand friction material, giving more braking power.

Actual friction value of M550 calculates to an outstanding friction coefficient of 0.37 compared to other claimed aftermarket high performance and even OE friction materials.

R90 PLUS TESTING

R90 PLUS Testing - Meritor MAX brake pads exceed R90 minimums

Tests for Commercial Vehicle pads are:

Hot Shear testing – This is same test as required by R90 at ambient temperature but Meritor also do it on 300°C hot pads and require the shear strength to exceed the R90 minimum of 250N/cm² of friction material (which it does).

Meritor also carry out a full range of performance testing primarily on dynamometer to review a whole range of performance characteristics across a range of pressures, speeds and temperatures that are not required by R90 testing. These tests are performed on a regular basis for production samples to ensure consistent high performance products.

Finally we carry out full scale inertia dynamometer wear testing which includes characteristic performance checks between each wear section. This testing to International standards is used to benchmark both the pad wear and rotor wear of all Meritor grades against Original Equipment (OE) and other aftermarket offers.
