HAKKIMIZDA

Firmamız, 1973 yılında; filtre, madeni yağ, oto bakım ürünleri pazarlama ve üstübü imalatı ile çalışma hayatına başlamıştır.

Tam 37 yıldır filtre sektörü ve üstbü imalatında hizmet veren firmamız; başta Ege ve Akdeniz Bölgelerinde olmak üzere, ülke çapında sayısız kurum ve kuruluşla filtre ve üstbü tedarik etmektedir.

Firmamızın, 2006 yılında İzmir şubesи faaliyete geçmiş ve Fil Filtre ana bayiliği, Fleetguard, Donaldson gibi markaların yanı sıra, Mann Filter Ege – Akdeniz distribütörlüğünü alarak, filtre dağıtım ve pazarlama ağını daha da genişletmiştir. Filtre sektöründe her geçen gün pazar payını yükseltmenin诀kiler Otomotiv, tecrübesi ve bilgi birikimi, yaklaşık 15.000 çeşit zengin ürün yelpazesi, toplamda 10.000 metrekarelik depolama alanı, uzman personeli ve 15 adet dağıtım aracı ile Türkiye'nin en büyük filtrе tedarikçisidir.

En son teknolojik gelişmeler takip edilerek üretilen FILTORQ filtreler, deneyimimizin ve bilgi birikimimizin müşterisiye aktarımı olarak piyasaya sunulmaktadır. CNC makinesinde kendi aliminyum kalıpların üretimi ile ürün kalitesi en üst seviyede tutulmaktadır. Pilelenmiş filtre kağıtlarının mukavemetinin artırılması için spiral ip sargı uygulaması yapılmaktadır.

Filtre kılıfları heliks sargı sistemiyle üretilerek ürün mukavemetinde en üst seviyede tutulması sağlanmaktadır. Filtre kağıtlarının en uygun şekilde pilelenmesi için öncelikle buhar verilir, daha sonra ise demirden demire setlerde en iyi biçimde şekillenir ve en son aşamada isıtılırak pilelenmiş kağıtlar nihai formuna sokulmaktadır. Kağıt test makineleri ile orjinal filtrelerin kağıtlarının micron büyüklükleri, hava geçirgenlikleri ve basınc dayanıklıkları tespit edilerek üretime uygulanır. Filtre süzücü elemanlarından olan keçelerin birleştirilmesinde ultrasonic yapıştırma sistemi kullanılır. Eleman ya  ve yakit filtrelerinin plastik kapakları  is l işlem yöntemiylefiltre ka dına birleştirilmektedir.

ABOUT US

İkiler Otomotiv was established as based Denizli in 1973 and started business life with filter, lubricant, auto maintenance products marketing and producing oakum.

Our company has been serving for the filter industry and oakum manufacturing for 37 years. In the Aegean and Mediterranean Region, it supplies filters and oakum to numerous institutions and establishments throughout the country.

In 2006, the branch office of Izmir was established and became the main distributor of Fil Filter. Besides brands as Fleetguard, Donaldson; Mann Filter further expanded its distribution and marketing network by acquiring the distributorship of Mediterranean Region.

In filter sector, İkiler Otomotiv enhances its marketshare day by day. İkiler Otomotiv is the most extensive filter supplier with its experience, fund of knowledge, about 15.000 kinds of rich product range, 10.000 square meters of storage space in total, expert staff and 15 distribution vehicles.

FILTORM filters, which are produced by following the latest technological developments, are presented to the market as the transfer of our experience and knowledge to the customer. The product quality is kept at the highest level by producing its own aluminum molds in the CNC machine. Spiral rope wrap is applied to increase the strength of the pleated filter papers.

The filter cases are produced by helical winding system and the product strength is maintained at the highest level. In order to optimally filter the filter papers, steam is first introduced, then iron is best formed in the sets to iron and in the final stage, the pleated papers are heated to their final form. Micron size, air permeability and pressure resistances of paper filters and original filters are determined and applied in production. The ultrasonic gluing system is used for joining the felts from filter elements. The plastic covers of the element oil and fuel filters are joined to the filter paper by heat treatment method.

HAVA FİLTRELERİ

Temiz hava motorunuzun performansı ve ömrü için olmazsa olmaz unsurdur.

Etkin hava filtrasyonu çok önemlidir. Küçük mikardaki toz ve diğer yabancı maddeler motorunuza çok ciddi zararlar verebilir. Hava filtrelerinin amacı, motorunuzun hassas parçalarını istenmeyen kir, toz ve parçacıklardan korumaktır.

Filtorq hava filtreleri iki temel prensip üzerine dizayn edilip üretilmiştir.
Maksimum Filtrasyon - Optimum Performans.

Hava filtrelerinin en önemli parçası filtre

kağıtlarıdır (Süzücü eleman). Yüksek performanslı motorlar artırılmış hava akışına ihtiyaç duyarlar. Filtorq filtrenin yüksek dayanıklı bileşenleri, maksimum verimlilik sağlarken, minimum oranda sınırlamayı garanti eder. Fabrikamızda bulunan ileri teknoloji tam otomatik poliüretan makinelerimizle, tüm çeşitlerde filtreler üretilmektedir. Tek katmanlı ya da çok katmanlı olarak pilelenen süzücü elemanlar ile ihtiyaç duyulan her türlü filtrasyonu gerçekleştirecek hava filtreleri üretilmektedir.

Filtorq filtre geniş çapta ürün çeşitliliğiyle motorunuza yüksek koruma sağlar.

YAĞ FİLTRELERİ

Filtorq yağ filtreleri istenmeyen yabancı maddeleri filtreleyerek, motorunuza sürekli olarak temiz yağ akışını sağlar ve motorunuza korur.

Kirli yağlar, motorunuza kalıcı ve büyük boyutta zarar verebilir. Doğru yağ kullanımı yanında etkin filtrasyon ile motorunuzun ömrü artar ve tamir-bakım masrafları azalır. Modern motorların gerektirdiği yüksek standartları karşılamak için tüm motor bileşenleri

mömkün olan en yüksek seviyede performans göstermelidir.

Motor performansının devamlılığını sağlayacak şeyin yalnızca temiz motor yağı olduğu düşünüldüğünde, yağ filtrasyonu büyük öneme sahiptir.

FILTORQ FİLTRE yenilikçi eklentilere sahip en geniş ürün yelpazesini sunmaktadır.

YAKIT FİLTRELERİ

Uzun ömürlü Filtorq Filtreler geniş servis aralığı sağlar.

Kirli yakıt motor ömrünü etkileyen unsurlardan bir tanesidir. Motorunuzun maksimum performansta çalışması için en temel gereksinim temiz yakittır. Geliştirilmiş temiz yanın yakıtlar bile yanma odasına girmeden etkin bir şekilde filtre edilmelidir. Özellikle modern enjeksiyon sistemlerinde, kir parçacıkları aşınmaya sebep olmaktadır. Bu nedenle Filtorq Filtre yakıt filtrasyonunda maksimum verimlilik sağlar.

Bütün dizel yakıtlar biraz da olsa su içerir

ve bu suyun temizlenmesi dizel enjeksiyon sistemlerinde motor ömrünün artmasında önemli etkiye sahiptir. Yakıttaki su, korozyona sebep olarak ciddi hasarlara sebep olabilir. En kötüsü aracı durduracak şekilde, enjeksiyon sisteminde komple hasara yol açabilir. Filtorq filtreler üstün verimlilikle su tutma kapasitesine sahip filtrelerdir.

Filtorq spin-on filtreler uzun ömürlü ve geniş servis aralıklarına göre tasarlanmış ve üretilmiştir. Filtorq yakıt filtrelerinin montajı kolay yapılır ve en uygun şekilde yerine yerleştirilir.

KABİN (POLEN) FİLTRELERİ

Kabin Hava filtreleri insan sağlığında önemli rol oynar.

Kabin hava filtreleri günden güne otomotiv ve ağır vasıtalarında kullanımı artmaktadır. Bu filtreler araç içerisinde insan sağlığı için en önemli koruyucu unsurdur. Filtorq kabin filtreleri, klima ve ısıtıcı sistemden hava ile birlikte gelen ve gözle göremediğimiz maddeleri, tozları, nem ve diğer kirli maddeleri

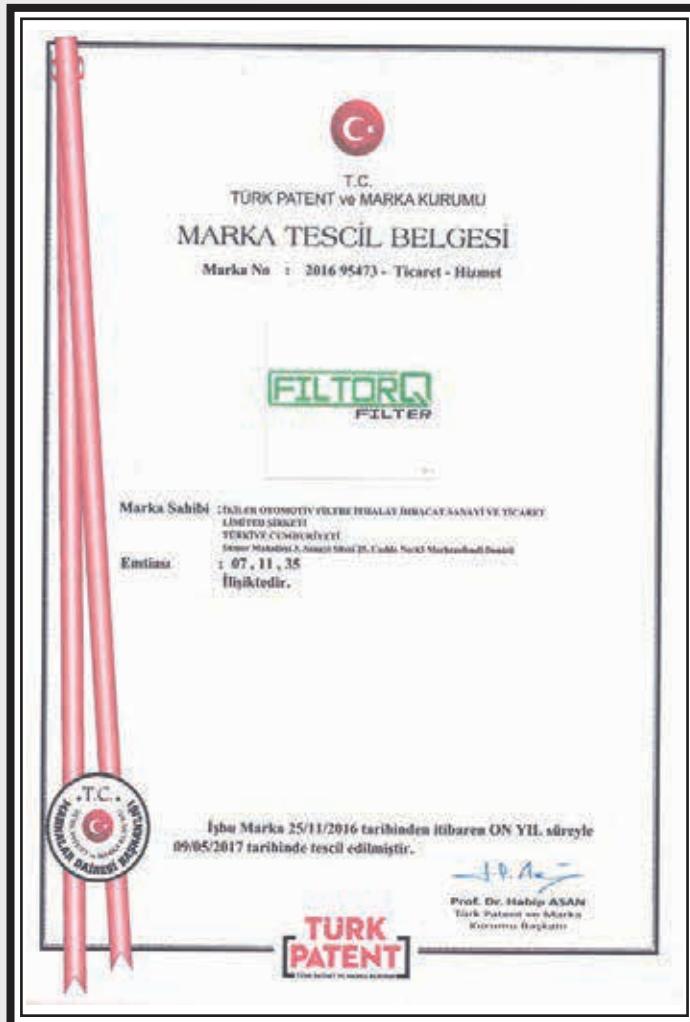

tutar ve temiz nefes almamızı sağlar.

Filtorq filtreler aynı zamanda klima ve ısıtma sistemlerinin daha verimli çalışmasını sağlar.

Filtorq hemen her araç grubunda ürettiği karbonlu kabin filtreleri ile de ihtiyaçlarınıza karşılamaktadır.
