MERITOR™

Commercial Vehicle Aftermarket – Europe

Meritor Slack Adjusters

ArvinMeritor Commercial Vehicle Aftermarket in Europe is pleased to announce the introduction of Meritor branded Automatic Slack Adjusters as part of its growing programme of braking products.

The initial range consists of 3 references which cover the most popular ROR trailer applications and a further 7 references will be made available shortly afterwards to complete the ROR trailer applications.

All components come from the same source as that used by ArvinMeritor for their original equipment trailer axle production, thereby ensuring the end user has guaranteed confidence in fitting a proven quality Meritor product. All steps of the production process are subjected to the highest quality checks which enable the products to perform to the original ROR specifications, and all products are subject to the normal Meritor warranty standards.

ArvinMeritor™

All prices are List Prices and are subject to normal discount terms. Prices are valid from 1st October 2004 until further notice. All references are priced at €120 and £80 each for the appropriate markets, supplied as a single unit in a Meritor box, together with the relevant mountings and fitting instructions.

The following cross references apply:

Meritor Reference	ROR Reference	ROR Alternative Reference	Haldex Reference	Comments
